

FiloCash — Figma Scope & Screen Change Document

Designer handoff: This document defines what should remain, what should be changed, and what must be newly designed for the expanded FiloCash scope.

Key decisions: Add Money is REQUIRED. Scan & Pay is for same-country payments. Send Money has two options: Employee Payout and Remittance Payout. Employee Payout branches into Government / Non-Government. Remittance supports Cash Pickup / FiloCash Wallet and requires Transfer Reason.

1. Product Structure

- Customer App: wallet, Add Money, Scan & Pay, Send Money, Receive, History, KYC, Security and Profile.
- Merchant Portal: onboarding, dashboard, payments/QR, settlements, reports, customers/team, tax/compliance and security.
- Admin Portal: users, merchants, wallets, transactions, KYC/AML, fraud/risk, employee payouts, remittance, cash pickup, fees/FX, tax, reconciliation, reports and audit.
- Remittance should use a guided Remitly-style experience: destination → recipient → payout method → amount → reason → fees/rate → review → authentication → tracking.

2. Customer App — Existing Screens to Keep / Modify

Screen / Area	Status	Figma action
Login / Signup / OTP / Security	KEEP + UPDATE	Retain existing auth. Add device, biometric/2FA and failure states.
KYC & Verification	KEEP + UPDATE	Keep document/identity flow; add approved, rejected, resubmit and additional-info states.
Home / Wallet	KEEP + UPDATE	Make wallet central. Quick actions: Add Money, Scan & Pay, Send Money, Receive.
Wallet / Balance	KEEP + UPDATE	Show available balance, pending amount, limits and transaction shortcuts.
Add Money	KEEP + EXPAND	Required full flow; see Section 4.
Send Money	REDESIGN	First show Employee Payout vs Remittance Payout.
Receive Money	KEEP + UPDATE	Wallet/recipient details, QR/share and status.
Transaction History	KEEP + UPDATE	Add filters for Add Money, Scan & Pay, Employee Payout and Remittance.
Transaction Detail	KEEP + UPDATE	Reference, status, amount, fees/tax, date/time and counterparty.
Profile / Security / Notifications	KEEP + UPDATE	Retain and add financial/compliance notifications and security states.

3. Scan & Pay — Same Country

This is a domestic payment flow and should be visually separated from international remittance.

Screen / Area	Status	Figma action
Scan & Pay entry	NEW/UPDATE	Home quick action.
QR Scanner	NEW	Camera, permission, flashlight and scan state.
Payee detected	NEW	Merchant/payee name, verified status and country.
Amount entry	NEW	Amount, note, balance, fee if applicable.

Screen / Area	Status	Figma action
Payment review	NEW	Payee + amount + fee + total + funding source.
Authentication	NEW	PIN / biometric / OTP according to security policy.
Processing	NEW	Pending state; prevent duplicate payment.
Success receipt	NEW	Reference, receipt, share/download.
Failure / invalid QR	NEW	Retry, change method, support and error reason.

4. Add Money — Required Full Flow

Screen / Area	Status	Figma action
Add Money landing	KEEP + REDESIGN	Balance, limits and funding methods.
Select payment method	NEW/UPDATE	Bank account, card and supported local payment methods.
Enter amount	NEW/UPDATE	Preset/custom amount, limits and fee visibility.
Payment review	NEW	Funding source, amount, fee and wallet credit.
Authentication	NEW	OTP / 3DS / biometric / PIN as applicable.
Processing	NEW	Pending state.
Success	NEW	Wallet credited, reference and receipt.
Failure	NEW	Reason, retry and change funding method.
Add Money history	NEW/UPDATE	Dedicated status/filter.

5. Send Money — New Top-Level Choice

Do not ask for recipient details immediately. First present the two business purposes.

Screen / Area	Status	Figma action
Send Money landing	NEW	Two cards: Employee Payout and Remittance Payout.
Employee Payout	NEW	Domestic/business payout; next branch Government or Non-Government.
Remittance Payout	NEW	International transfer; destination and payout method.

6. Employee Payout — Government / Non-Government

Screen / Area	Status	Figma action
Payout type	NEW	Government / Non-Government selection.
Employee selection	NEW	Existing employee or add new employee/payee.
Employee details	NEW	Name, account/wallet and required identifiers.
Government details	NEW	Government/tax/statutory fields and compliance confirmation.
Non-Government details	NEW	Business/internal payout fields; no irrelevant government fields.
Amount / date	NEW	Amount, payout date/schedule and available balance.
Tax / fee calculation	NEW	Show applicable tax/withholding/fee before confirmation.
Review payout	NEW	Employee, type, amount, tax, fee, total and source wallet.
Authentication	NEW	PIN / biometric / OTP.
Processing / success / failure	NEW	Complete state set with reference and receipt.
Employee payout history	NEW	Government/non-government and status filters.

7. Remittance Payout — International

Recommended guided flow: Destination → Recipient → Payout Method → Amount → Reason → Compliance → Review → Authentication → Tracking.

Screen / Area	Status	Figma action
Country / destination	NEW	Choose destination and show supported corridor/currency.
Recipient	NEW	Select existing or add new; destination-specific required fields.
Payout method	NEW	Cash Pickup OR FiloCash Wallet.
Cash Pickup details	NEW	Pickup partner/location, recipient requirements and instructions.
FiloCash Wallet payout	NEW	Recipient FiloCash wallet/account and verification.
Send / receive amount	NEW	Sender amount, receive amount, FX rate, fee and total.
Transfer Reason	NEW + REQUIRED	Purpose/reason selection with optional details where needed.
Source of funds	NEW / COMPLIANCE	Capture when required.
Compliance / AML	NEW	Screening, additional information and review state.
Review	NEW	Full transparent transfer summary.
Authentication	NEW	PIN / biometric / OTP.

Screen / Area	Status	Figma action
Processing	NEW	Pending state; prevent duplicate submit.
Success	NEW	Reference, payout method, amount, rate/fee and delivery/pickup expectation.
Failure	NEW	Reason, retry/change details/support.
Tracking	NEW	Initiated → review → processing → pickup-ready/credited → completed/failed.
Remittance history	NEW	Dedicated international transfer filter.

8. Merchant Portal — Existing + New Scope

Screen / Area	Status	Figma action
Dashboard	KEEP + UPDATE	Add domestic payments, QR sales, settlement and fee summaries.
Payments / Transactions	KEEP + UPDATE	Add Scan & Pay and status filters.
QR Codes	KEEP + UPDATE	Domestic QR states: active/inactive/expired.
Settlements	KEEP + UPDATE	Settlement status, fees and reconciliation.
Reports	KEEP + UPDATE	Payment, settlement, fee and tax reports.
Team / Employees	KEEP + UPDATE	Employee records where business payout is managed.
Tax / Business Compliance	NEW/UPDATE	Government tax number, tax configuration and calculation/reporting.
Merchant onboarding	KEEP + UPDATE	Business photo, KYB/KYC and security.
Security Center	KEEP + UPDATE	2FA, devices, sessions and alerts.

9. Admin Portal — Existing + New Scope

Screen / Area	Status	Figma action
Dashboard	KEEP + UPDATE	KPIs for wallet funding, domestic payments, employee payouts and remittances.
Users / Merchants	KEEP + UPDATE	KYC/KYB, status, wallet and transaction access.
Wallets	KEEP + UPDATE	Balances, holds, limits, Add Money monitoring and adjustments.
Transactions	KEEP + UPDATE	Type/status/country/currency filters.
KYC / AML	KEEP + EXPAND	Remittance screening and additional-info workflow.
Fraud / Risk	KEEP + EXPAND	Domestic and remittance risk signals.
Employee Payouts	NEW	Government/non-government monitoring, tax/compliance and exceptions.
Remittances	NEW	Corridors, payout method, reason, status and compliance.
Cash Pickup	NEW	Pickup-ready/completed/failed monitoring.
FiloCash Wallet payout	NEW	Wallet-credit monitoring and reconciliation.
Fees / FX / Currencies	KEEP + EXPAND	Remittance fees, exchange rates and supported corridors.
Tax Configuration	NEW/UPDATE	Tax rules, identifiers and reports.
Settlements / Reconciliation	KEEP + UPDATE	Domestic + payout/remittance reconciliation.
Reports	KEEP + UPDATE	Domestic, payout, remittance, tax, fee and reconciliation reports.
Support / Cases	KEEP + UPDATE	Payment failure, remittance delay, pickup and compliance cases.
Audit Logs	KEEP	Full financial/compliance audit trail.

10. Final Customer Navigation

Section	Flow
Home	Wallet + Add Money + Scan & Pay + Send Money + Receive

Section	Flow
Add Money	Method → Amount → Review → Auth → Processing → Result
Scan & Pay	Scan → Payee → Amount → Review → Auth → Result
Send Money	Employee Payout / Remittance Payout
Employee Payout	Type → Employee → Gov/Non-Gov → Amount/Tax → Review → Auth → Result
Remittance	Country → Recipient → Cash Pickup/FiloCash Wallet → Amount/FX/Fee → Reason → Compliance → Review → Auth → Tracking
History	All + category filters + transaction detail
Profile	Personal + KYC + Security + Devices + Limits + Notifications

11. Global States Required

- Loading/skeleton
- Empty state
- Validation error
- Invalid/expired QR
- Invalid recipient
- Insufficient balance
- Limit exceeded
- Authentication required/failed
- Pending/processing
- Success
- Failed
- Cancelled
- Compliance review / additional information required
- Suspended/blocked
- Session timeout/device verification

12. Figma Designer Instructions

- Build complete clickable journeys, not isolated screens.
- Clearly separate domestic payments from international remittance.
- Use reusable components for amount input, fee/tax summary, recipient card, payout method, review, receipt, status tracker and authentication.
- Employee Payout must clearly branch Government vs Non-Government.
- Remittance must clearly show Cash Pickup vs FiloCash Wallet.
- Transfer Reason must appear before final remittance review.
- Every financial flow needs happy path + failure + pending + retry/cancel states.
- Update existing design-system components instead of duplicating components.

13. Priority

Section	Flow
P0 — Critical	Add Money; Send Money choice; Employee Payout; Gov/Non-Gov; Remittance country/recipient/payout method; Cash Pickup; FiloCash Wallet; Transfer Reason; review/auth/result.
P1 — High	Scan & Pay; remittance tracking; transaction details/history; wallet limits; merchant/admin remittance monitoring.

Section	Flow
P2 — Supporting	Tax configuration/reporting; employee payout history; cash-pickup operations; reconciliation; support/case states; notifications.

14. Figma Deliverable Checklist

- Updated Customer App screen map + prototype
- Complete Add Money journey
- Complete domestic Scan & Pay journey
- Complete Employee Payout with Government/Non-Government branches
- Complete Remittance with Cash Pickup/FiloCash Wallet
- Transfer Reason + compliance states
- Updated Merchant Portal affected screens
- Updated Admin Portal affected screens
- All loading/empty/error/pending/success/failure states
- Reusable components and variants aligned with FiloCash design system

Final handoff objective: The Figma file should demonstrate the full end-to-end money movement across Customer, Merchant and Admin surfaces, including domestic payments, wallet funding, employee payouts and international remittance.
